

CYBORG PRIDE BRACELET DESIGN

The people have spoken! I am pleased to share with you the most popular pattern in our "Cyborg Pride" poll.

I designed this pattern with the intention of using it to make a beaded bracelet, but it is suitable for all grid-based crafts: cross-stitch, mosaic, etc. Here are two examples of items I've made using it.

This design features a CRT-D, which is a device with three leads. If your own device has fewer leads, it's easy to "erase" unnecessary leads in the design by making the relevant squares black.

If you make something using this design, I would love to see it! Please tag @hearty_tales (Twitter) and @hearty_tales_insta (Instagram) if you post makes on social media.
