INSTRUCTIONS TO MAKE A BOOK: Cut neatly around the black edge lines. With printed sides facing out, fold the paper in half - short edge to short edge - and crease well. [Optional: glue the paper together at this point.] Using page numbers to guide you, fold long edge to long edge so page 6 meets page 7. Fold short edge to short edge so page 4 meets page 5. Fold short edge to short edge so page 8 meets page 9. Staple along the fold/spine. Trim folded pages at top and right-hand side. Voila, your book is made!
